ACTIVE WEATHER WARNINGS, WATCHES and ADVISORIES: http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

High pressure offshore will maintain dry weather conditions through the weekend. Areas along the coast will continue to see night and morning low clouds and fog.

San Francisco Weather:

Warmer temperatures are expected away from the coast the next few days. Otherwise little change is forecast through the weekend with continued below normal temperatures expected especially for inland areas. Much warmer inland temperatures are possible by the middle of next week.

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY

Sacramento Weather:

Weak troughing over the West Coast with northwest flow aloft will bring dry conditions with a little below normal temperatures through early next week. High pressure moving inland over the West Coast will bring warming to near or a little above normal during the first half of next week.

Hanford Weather:

Daytime high temperatures will remain near seasonally normal, generally in the low to mid 90s. Temperatures will slowly rise during the second half of next week as high pressure builds over Central California. Otherwise, thunderstorms will be possible along the Sierra Crest this afternoon.

WEATHER

WEATHER SYNOPSIS BY REGION:

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Some lingering mid-level moisture will result in a slight chance of mountain and desert thunderstorms this afternoon. Otherwise, expect a slight cooling trend Friday through the weekend with continued coastal low clouds and fog. For early next week, high pressure is expected to build over the area bringing warmer conditions and limited coastal stratus.

Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

An upper level low pressure system will slowly move east over extreme southern California Thursday. There is a very small chance of an isolated shower or thunderstorm tonight and early Thursday, then the chance of thunderstorms will be primarily over the mountains and deserts by Thursday afternoon. Temperatures will continue to be below normal Thursday. After the low exits to the east Thursday night there will be dry and warmer weather Friday followed by slight cooling over the weekend. High pressure aloft will build next week and bring a warming trend.

Southeast California Weather:

There will be an increased chance of showers and thunderstorms today as an upper level low pressure system moves through southeastern California. Storm chances will decrease Friday through the weekend as drier air moves in. Below normal temperatures are forecast through Saturday gradually returning to normal early next week.

Week Ahead Weather

08/21 – 08/27

Thursday

- Thunderstorm activity will remain possible across southeast California but no significant impacts are expected

Friday-Wednesday

- No significant impacts expected

CAL OES ACTIVATIONS

Cal EOC Incident – 2014 Drought

- The SOC is activated at Level 2 in support of the Drought State of Emergency from 0800-1700 hours daily.
- The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed.
- The Southern REOC is activated at Level 1.
- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is Monday – Friday, 0800-1700 hours.

Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- Current Reservoir Levels continue to decline. Levels as of August 19th : Don Pedro 42%; Exchequer 17%; Folsom Lake 40%; Lake Oroville 32%; Millerton Lake 47%; New Melones 24%; Pine Flat 12%; San Luis 20%; Lake Shasta 32%; Trinity Lake 31%; Pyramid Lake 94%; and Castaic Lake 44%.

- Emergency Drinking Water Procurement and Distribution Planning Guidance (rev. May 2014)
Significant changes have occurred to the structure of California's state government organization. Rapid advances in systems, science, and technology have helped emergency managers improve coordination, forecasting, and situational awareness. Because of these changes, the *Multi-Agency Emergency Response Procedures for Potable Water Procurement & Distribution* document has been replaced by the *Emergency Drinking Water Procurement and Distribution Planning Guidance*. The intent of this guidance document is to clarify the roles and responsibilities of the stakeholders involved in locating, procuring, and delivery of emergency drinking water¹ to populations in California. Consequently creating a framework for agencies and organizations to work together to enhance preparedness.

Situational Summary

- State Board Mandatory Conservation Regulations Now in Effect: The state's first-ever emergency regulations mandating urban water conservation became effective will be in effect until April 25, 2015.
http://www.waterboards.ca.gov/waterrights/water_issues/programs/drought/emergency_regulations_waterconservation.shtml
- The 2014 Governor Drought Task Force continues to meet regularly to take actions that conserve water and coordinate state response to the drought.
- Cal OES continues to gather drought-related costs from state agencies and local governments.
